

# HOW TO CHOOSE CLEAR ROOFING

Welcome to the Sunnyside Guide. As you know, clear roofing is used for many building projects, including:

- Decks
- Patios
- Garages
- Conservatories
- Sheds
- Pool covers
- Greenhouses
- Warehouses

## You have several choices. So which one is right for you?

When it comes to Clear Roofing, you have several choices, from Entry Level PVC to Thick Glass. Polycarbonate is probably the most popular choice. Polycarbonate Roofing lets in the light, keeps out the rain, and blocks up to 99.9% of UV rays.

## Why is Polycarbonate so popular?

Polycarbonate is a strong, resilient thermoplastic that is also very lightweight and capable of withstanding extreme temperatures. Polycarbonate is virtually unbreakable. It is so tough it is replacing glass in greenhouses, as it is shatter-proof. Because you have several choices, we've put together this handy user-guide to help you select the right Clear Roofing for your project.

## CLEAR ROOFING GUIDE

Description	Entry Level Cheapest clear roofing you can get.	Entry Level Polycarbonate Roofing.	Better than entry level. Thicker UV coating.	Thicker UV protective coating. Heat reducing tech.
